

## Standing Scott Bench

 [bodytone.eu/en/shop/pro/strength/plate-loaded/standing-scott-bench-srb02e](https://bodytone.eu/en/shop/pro/strength/plate-loaded/standing-scott-bench-srb02e)

### Dimensions

135 x 105 x 105 cm

### Weight

69 kg

### Structure

110x52 mm Steel pipe, 3 mm thick as per UNE EN 10219, quality s-275-J0H. Enriched and optimized to maintain a constant section in the bending process, avoiding fragile areas with low breakage rate. Cold bending process by 4-roller system to avoid deformation during the process, keeping its physical characteristics throughout the piece.

### Painting process

3 layers of paint. Steel pickling and stabilized by immersion of the parts in different degreasing solutions to ensure a perfect and complete cleaning of the base material. Antioxidant primer to ensure adequate isolation of internal oxidation and good paint adhesion. 2 final coats of epoxy paint.

### Design process

Ergonomic and biomechanical study under our associated professional athletes. After a long design process; from the drawing of the sketch, prototypes making and tested by athletes our products are released to the market.

### Welding

Perimeter closing welding in structural points and union plates.

### Assembly processes

10 mm plate-against Plate system, to avoid looseness and torsion in maximum effort areas. Ergonomic and biomechanical research optimized for every exercise.

### Padded

Leather simile perspiration resistant,antibacterial and antiallergenic.Back pad,seat pad and rolls in foam 80 kg/m3 density that provides an optimum support for your training and a uniform contact.Resistant to deformation

### **Others**

Plate supports made in burnished steel,providing more stability to the machine.Turned Aluminium endings.Screw hardness 10.9.Regulation system by a single bolt made of techno polymer with 750 shear rate.4 non-slip rubber bases.4 non-sñip rubber bases.
