

Treadmill

bodytone.eu/en/shop/pro/cardio/treadmills/treadmill-evot3-ts/

Description

Equip your gym with Bodytone treadmills, a safe bet. Lcd screen where you can measure all your training in detail. Unparalleled running experience. The robustness of the Bodytone treadmills brings a plus of security to your cardio workouts.

The **EVOT3**, incorporates quick access keys on its arms that will make it easier for you to regulate your running training, without having to touch the screen. Greater security and comfort for the user.

Our **EVOT – TS** professional treadmill is a robust and reliable treadmill with a 60 cm wide running surface, allowing you to run whatever the intensity and duration of your workouts. In addition, it connects to Polar devices for heart rate recording.

Also includes 21" HD touch screen with customizable workout programs, Android OS, internet, multimedia, apps, bluetooth, USB and headset jack.

Security and quick access

On the front panel of the EVOT3 treadmill you can find shortcuts to start or stop your workout, as well as speed and incline adjustments and a large emergency stop button, which includes the clip system to increase safety while the user is using the treadmill.

Large running surface

Thanks to the 60 cm wide surface, the user will be able to enjoy the treadmill with total freedom of movement, thus improving comfort when training.

Storage Accessory

Ideal for storing your mobile phone, keys, water bottle or other personal items while you run. It has one on each side of the treadmill.

Integrated heart rate monitor

Get your heart rate directly from the machine's sensors built into the handlebar of the treadmill, so you can get real-time data on workout intensity and monitor cardiovascular-type exercises.
